### NOTES

### 1. Basis of preparation

The Group Interim results have been prepared in accordance with International Financial Reporting Standards (IFRS) and specifically International Accounting Standard IAS 34: Interim Financial Reporting and the AC 500 Standards as issued by the Accounting Practices Board or its successor, the Listings Requirements of the JSE Limited and the Companies Act No. 71 of 2008. These results have been prepared by the Chief Financial Officer, Gys Wege CA(SA), and have not been audited or reviewed by the Group's auditors, KPMG Inc

2. Significant accounting policies

The Group Interim results have been prepared under the historical cost convention, except for the revaluation of certain properties and financial instruments. The accounting policies adopted are consistent with those followed in the preparation of the Group's annual financial statements for

the period ended 31 March 2011. 3. Related party transactions

Expenses recognised in relation to the provision of managerial services received from HCI amounted to R2 100 000.

Residential premises were leased to Mr A Ntuli (director) for R21 090.

A bridging loan totalling R30 million was advanced by HCI Treasury which bears interest at prime. The associated interest expense is R245 075.

Capital expenditure and commitments

Net capital expenditure during the period under review amounted to R97,3 million (2010: R37,2 million). There are further commitments in respect of contracted capital expenditure as at 30 September 2011 of approximately R83,3 million (2010: R33,1 million).

Restatement of prior year results

The prior year statement of comprehensive income has been restated so as to separately identify the additional discontinued operations.

### COMMENTARY

Despite the difficult trading conditions experienced in the period under review, most of the Group's business segments made good progress with operating profit growth being shown in the Textiles and Property, as well as the Toys, Stationery and Electronics segments. However, the good work done in these areas was blighted by the very disappointing performance of the Clothing Segment which saw its operating loss worsen significantly in the current period.

The Group as a whole managed to return to the black for the six months ended 30 September 2011, posting an attributable profit of R1,4 million compared to an attributable loss of R71,3 million in the corresponding period. The main reason for the improvement was the cessation of the operations that were reported in the discontinuing line in the prior year

Turnover from continuing operations was up 3% due mainly to increases in raw material prices rather than increased volume. The Group's gross margins came under severe pressure being down 4,7% from 23,6% in the prior period to 18,9% in the current period. Although margin pressures were experienced across all the Group's business segments, the most severe effects were felt in the apparel manufacturing business where increases in raw material and production costs were unable to be passed on to customers while reduced volumes also meant reduced

Although the Group's gross margin was down, operating profit was up R17,9 million (72,5%) to R30,9 million on the back of a combination of cost savings and the recognition of some R46 million of production incentive in the current year. We did not recognise any production incentive in the comparative period as there was no certainty on the incentive scheme at the time. Income from the production incentive is recognised in accordance with the strict requirements of the relevant accounting standard, which amongst other things requires us to match the income and expenses associated with the incentive wherever possible.

The performance of the Textiles segment continues to improve, with all but one of the business units within this sector now being profitable. Operating profit grew from R8,0 million in the prior period to R33,7 million although this does include benefits from the production incentive. If one excludes the effects of the production incentive entirely, operating profit grew by an impressive 29%. The improvement in these business units is particularly pleasing given that it has been achieved under difficult trading conditions. Most of the business units within this segment are running at well below capacity and remain primed to take advantage of any improvements in the economic conditions.

### Clothing

The clothing operations continue to be problematic with the continuing operations delivering an operating loss of R50 million (2009: R20 million).

Although undoubtedly the apparel manufacturing business is still plagued by all the  $\,$ issues that have weighed down the entire sector for a number of years, the losses

incurred cannot be entirely ascribed to the industry woes. There are a number of areas that are under our direct control where significant improvements can and

There are a number of improvement measures at various stages of completion that

- are taking place to address the poor performance of this business, most notably: • a complete revamp of the IT backbone that will ensure that reliable and timely information is received in order to enhance decision-making processes. This has
- the material resource planning system has been upgraded and now runs off a central platform to: enable greater visibility of material flow throughout the operations, improve production planning and ensure better delivery performance;
- rationalisation of the product portfolio to remove unnecessary complexity in the business and ensure that margins can be maintained;
- finalising the centralisation process to reduce fixed overheads. Until the centralisation process is completed, the Group is incurring costs in maintaining additional production and administration facilities; and
- a continuous focus of productivity improvements.

Unfortunately, the turnaround of the clothing division has been slower than we first anticipated. Any improvements that have been made have been lost to reduced margins and declining volumes. Our production facilities in the high-wage metro areas are of particular concern as over time these factories have lost more and more of the long-run work without which factory efficiencies suffer. This has resulted in further restructuring being required in these areas.

However, there are a number of positive initiatives taking place in the industry

- · the advent of the production incentive which has provided a level of stability and enables the business to invest in necessary equipment upgrades and process
- the new wage dispensation that has been agreed which provides for lower wages for new entrants into the industry is a positive step and should benefit the industry generally. However, it's a moot point whether this dispensation is of benefit to the more established manufacturers with a large number of existing employees. We believe that there may be benefit to this in the longer term and that if it assists the local industry generally to grow employment there will be positive spin-offs in time;
- the weakening Rand will be of assistance;
- the current discussions around duty rebates on fabrics not locally produced are encouraging, although there is a genuine concern from the textile manufacturers that if this process is not carefully managed it will have significant negative
- consequences on this important sector; and the local procurement initiatives in both the public and private sectors.

The internal issues that are being addressed and the more positive external factors give us hope that this business will show improvements in time. However, we expect that any improvements that may come will not materialise in the short term and conditions in the second half of this financial year are likely to remain

## **Brand Identity**

We have previously mentioned that branded products would be an area of focus for the Group and that a new division, Brand ID (www.brand-identity.co.za), had been formed to concentrate on the development of lifestyle brands.

Of particular note was the launch of the 46664 fashion label during the period. Early indications for the brand are very positive. We are investigating launching the brand internationally in due course and are currently evaluating potential partners to assist in specific regions. We will also shortly be launching an on-line retail store (www.46664fashion.com) which is the Group's first real foray into e-retailing.

### Toys, stationery and electronics

The businesses within this segment continue to perform solidly. Although turnover only grew by 1,5% to R210 million, good cost controls and some assistance from the stronger Rand resulted in operating profit growing by 26% to R13 million. The performance of the electronics business in particular was pleasing with some of the longer-term strategies that were put in place to make this business more competitive starting to take effect.

### **Properties**

The Group's property development continues at pace with some 86 000 m<sup>2</sup> of lettable space either having already been developed or nearing completion. As at 30 September 2011, we have signed up tenants for approximately 71 000  $m^2$ of this space with good interest being shown in the last 15 000 m². The Group has an additional 61 000 m<sup>2</sup> which will be developed in time, provided we have sufficient tenants signed up.

Although it was anticipated that the operating profit for the properties segment would be down on the prior year given the amount of space under construction, a once-off income item of R14 million helped lift operating profit by 33% to R31,7 million (2010: R23,9 million).

# Material litigation

The litigation against former directors has proceeded to arbitration hearings which have been completed, other than for final argument which is scheduled to be heard in the first quarter of 2012.
